

SPEAKING OF CYCLING...

Siva Cycle Atom

The Siva Cycle Atom is a great addition to your bike that uses the energy from your tires to generate energy to charge your phone or other devices. This gadget requires no extra effort; you just attach the atom onto your rear tire hub and the energy is fed into a battery pack. This pack simply detaches from the wheel and has a USB port to charge whatever device you want. For more information visit: www.purecycles.com/product/siva-atom
